

# Title

*(type of presentation, e.g. Master Thesis Final Presentation)*

**First Name Last Name**

e-mail address

**Advisors' First Name(s) Last Name(s)**

e-mail address

# Motivation

- Motivation of the topic
  - Introduce the considered scenario
  - Give background on the topic
  - What are the common problems?
  - What are the state-of-the-art solutions and approaches?

# Goal and Approach

- Goal of the thesis
  - ...
  
- Main steps/tasks to achieve the goal:
  - Modeling of ...
  - Implementation of ... Into ... Using ...
  - Simulation ... Of ... Using ...
  - Comparison of ...
  - ...

# Prior Work and Open Issues

- Prior work
  - List here the background and starting point material and give referenes, e.g. earlier results, available models, available tools from previous thesis, publications, advisors's proposal,... Master/Diploma/Bachelor Thesis
  
- Open issues
  - List here what is not yet available and hint at your thesis topic!

# Overview of Thesis Results

- Summarize your contribution
  - Explain chosen approach
  - Show results, e.g. simulations
  - What are the strengths/weaknesses?
  - What are the implications?

## Figures Showing Results

- Labels for axis and annotations have to be readable!
- Fonts should be the same as in the presentation
- Consider only colors that are not too bright (Here green is maybe not the best c

- Always add one sentence concluding your observations

# Summary of Thesis Results

- Summarize your contribution at the end of the presentation
  - Explain chosen approach
  - Show results, e.g. simulations
  - What are the strengths/weaknesses?
  - What are the implications?
  
- Give outlook/make suggestions for further work
  - What could not be done due to time limitations?
  - Any unsolved problems that occurred?
  - Any extensions which would be nice to have?

- This template shows only the most important slides to be considered for your presentation
- You may add any additional slides to explain the approach, methods, simulation setup, results, evaluation ... details
- Rule of thumb for number of slides: 1 slide per two minutes of presentation time
- For the Final Presentation it is recommended to have an executive summary at the beginning, e.g. after the motivation, and a summary with an outlook at the end (for both slide 5 could serve as a template).
- Always add references!
